

# Summary and knowledge check

5 minutes

In this module, you learned about cybersecurity threats and how the new threat protection tools from Microsoft protect your organization's users, devices, and data.

Now that you have completed this module, you should be able to:

- Define security threats.
- Understand common threats.
- Explain how the threat landscape is evolving.

## Check your knowledge

1. Threats are the potential weakness that attackers can use to infiltrate your organization.

- ☐ True
- ☐ False

2. Which of the following choices describe the benefits of Microsoft 365 Defender?

- ☐ Coordinate defenses to stop attacks from spreading and autoheal impacted assets.
- ☒ Control and help secure email, documents, and sensitive data inside and outside your company walls.
- ☐ Safeguard access to data and applications by requiring a second form of authentication and deliver strong authentication via a range of easy-to-use authentication methods.

3. Which of the following is not part of the typical attack timeline?

- ☐ Research and preparation
- ☐ Data exfiltration
- ☐ Attack discovered before 24 hours
