Answer the following questions to see what you've learned.

1. What is the benefit of using a report tooltip?

- ☒ To give users additional information about a report visual, such as the author and date/time it was created.
- ☐ To provide additional detail that is specific to the context of the data that is being hovered over.
- ☐ To give users the ability to export data from the visual.

2. Which of the following options is not one of the four components in the Q&A visualization?

- ☐ The question box, where users enter their question and are shown suggestions to help them complete their question.
- ☐ A pre-populated list of suggested questions
- ☐ Automatic creation of a custom tooltip
- ☐ An icon that users can select to convert the Q&A visual into a standard visual.
- ☐ An icon that users can select to open Q&A tooling, which allows designers to configure the underlying natural language engine.

3. Do you need to import custom visuals each time you want to use them when you are developing a new report?

- ☐ No, custom visuals are always available for selection under the Visualization pane.
- ☐ Yes, custom visuals must be imported from AppSource each time you start developing a new report.
- ☐ No, custom visuals only need to be imported once and will always remain in Power BI for future use in a new report.
