1. Which of the following are best practices for managing Teams Rooms?

- ☐ Block inheritance of group policies but not Intune conditional access policies.
- ☐ Enable multi-factor authentication and use dynamic groups.
- ☐ Create custom Active Directory organizational units, create dynamic groups, and block group policy inheritance.

2. What advantage do dynamic groups in Azure Active directory provide?

- ☐ You can easily group Teams Rooms by using a naming standard.
- ☐ Automatically apply Intune policies.
- ☐ Require you to manually add Teams Rooms to a group called Dynamic.

3. Which tool is **NOT** part of Configuration Manager in Microsoft Endpoint Manager?

- ☐ Intune
- ☐ Power Automate
- ☐ System Center Configuration Manager

4. How do you best update Teams Rooms?

- ☐ Let Teams Rooms update the app but manually install new versions of Windows as they get released.
- ☐ Manually update the Teams Rooms app but let the Windows updates get installed automatically.
- ☐ By leaving it alone.
