

# Summary and knowledge check

5 minutes

In this module, you reviewed the Microsoft Teams user experience and learned about requirements and important considerations for deploying Teams as part of a Microsoft 365 installation.

Now that you have completed this module, you should be able to:

- Describe Teams capabilities and user experience.
- Explain Teams core technologies.
- Understand Teams management tools.
- Explain the relationship between Microsoft 365 Groups and Teams.
- Explain Teams licensing.
- Plan for Teams governance.
- Plan for lifecycle management.
- Describe the Teams networking requirements.

## Check your knowledge

1. Several members of your organization need to come together to work on a specific, short-term project. What should their Microsoft Teams administrator create?

- ☐ A new team
- ☐ A new channel
- ☐ A new chat group

2. For the full Teams experience, users should be enabled for every service EXCEPT:

- ☐ Exchange Online
- ☐ SharePoint Online
- ☐ OneDrive for Business
- ☐ OneNote Online
- ☐ Microsoft 365 Group

3. Which management tool can administrators use to access data across Microsoft 365?

- ☐ Microsoft PowerShell

- ☐ Microsoft Teams admin center
- ☐ Microsoft Graph API
