Append Merge Combine Column Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	1. What is a	risk of having null values in a numeric column?				
 That function AVERAGE of data will be incorrect. 2. If you have two queries that have different data, but you want to concatenate the results into one query with all the combined rows, which operation should you perform? Append Merge Combine Column 3. Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	0	That function SUM of data will be incorrect.				
 2. If you have two queries that have different data, but you want to concatenate the results into one query with all the combined rows, which operation should you perform? Append Merge Combine Column 3. Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	0	That function MAX of data will be incorrect.				
into one query with all the combined rows, which operation should you perform? Append Merge Combine Column 3. Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results.	0	That function AVERAGE of data will be incorrect.				
 Merge Combine Column Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	-	·				
 Combine Column 3. Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	0	Append				
 3. Which of the following selections are not best practices for naming conventions in Power BI? Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	0	Merge				
 Rename columns to have spaces in them. Abbreviate column names. Replace values that have integers with human readable results. 	0	Combine Column				
 Abbreviate column names. Replace values that have integers with human readable results. 		the following selections are not best practices for naming conventions in Power				
Replace values that have integers with human readable results.	0	Rename columns to have spaces in them.				
	0	Abbreviate column names.				
Check your answers	0	Replace values that have integers with human readable results.
