Summary and knowledge check

10 minutes

In this module, you learned that Microsoft offers a number of solutions that help organizations protect and secure an organization's resources and data, wherever that data may reside and how by using a device management solution like **Intune** or **co-management with SCCM**, organizations can make sure that only authorized people and devices get access to proprietary information.

Check your knowledge

1. Which of the following offers a simplified and manageable way to transition from either on-premises Active Directory or ConfigMgr and Active Directory to a modern management approach?

○   Azure

○   Microsoft Intune

○   Co-management

2. Which of the following options is NOT a valid method for enrolling Windows 10 devices into Microsoft Intune?

○   Add a non-AD joined account

○   System Center Configuration Manager co-management

○   Enroll in MDM only

○   Azure AD join (autopilot self-deploying mode)

○   Azure AD join (bulk enrollment)
